Whats New With iPad?

- Apple seems to have devoted their resources to iPad software updates, keeping the hardware lineup as is. Updating the software for a richer, more informative and enhanced user experience.

- Before we get more into that, there is one piece of iPad related hardware that is new.

Do You Really Need The WIFI+Cellular Version?

- iPads with the WIFI+Cellular technology retail for a slightly higher cost. This ranges between $130-200US depending on the model you choose.
- There is a GPS chip built-in that gives location identity even when there is no WIFI or Cellular coverage available.
- There is a monthly fee for Activation. Check with the Cellular Carrier of your choice for rates.
- Do you have Unlimited Data on your iPhone? You could use that as a HotSpot instead.
- Helpful tip… you don’t have to activate Cellular service to use a WIFI+Cellular iPad. It will work on WIFI alone.

iPadOS 17 Disclaimer

- Not all iPads that can run iPadOS 17 can take advantage of all the Features and Updates. I have found that the iPad Pro 10.5” and 6th - 7th generation iPad seem to have the most limitations.

- Some features require a Subscription to Fitness+, News+ or iCloud+

- Many features in the Wallet app require Apple Card.

- May I suggest you visit the Apple website for more information about your current iPad and compatibility.
