

Useful-Handy-Neat-Fun Mac/iOS Apps

Thank you all for joining me for my session, and I hope you found at least some of the apps of interest! Here is the list of the apps I showed, and where to find them:

App Privacy Report

Who are your iOS apps talking to?

On your iPhone or iPad, go to:

Settings->Privacy and Security->App Privacy Report (scroll almost all the way to the bottom)

And then simply turn it on and watch the fun!

AppZapper

AppZapper is a utility to remove an application and all of its associated files.

<https://www.appzapper.com/>

Be My Eyes

Provide visual support for those who need it!

<https://apps.apple.com/us/app/be-my-eyes/id905177575>

Capo

Learn songs on guitar at your own pace on your Mac, iPhone, or iPad.

<https://supermegaultragroovy.com/products/capo/>

Hand Mirror

See what you look like before other people do! Is that broccoli in my teeth...?

<https://apps.apple.com/us/app/hand-mirror/id1502839586?mt=12>

Magnifier

Don't you hate those tiny print menus at restaurants? No more!

On your iPhone:

Go to Settings->Accessibility->Touch

Scroll all the way to the bottom and tap Back Tap.

Then you can assign an app to open when you double-tap and/or triple-tap the back of your iPhone.

Meeter

See all your upcoming meetings right on the toolbar, on multiple collaboration platforms.

<https://apps.apple.com/us/app/meeter-for-zoom-teams-co/id1510445899>

Parcel

Track all your deliveries. Nice integration with Amazon as well.

<https://parcelapp.net/>

Pro Mouse

A nice tool for helping present anything on screen.

<https://apps.apple.com/us/app/pro-mouse/id1505869474?mt=12>

Shazam

What's that song playing?

On your iPhone (or iPad), go to Settings->Control Center

Scroll down to the second section, More Controls.

Tap the plus sign (+) next to Music Recognition.

Now, once you go to your Control Center, you'll see the icon (blue Shazam "S" icon). Tap it, hold your phone near the speaker where the song is playing, and it will identify the song and push a notification to it. If you have Apple Music, you can then open it there, and add it to your library.

SoundSource

Finally! A way to control the sound of individual apps on your Mac!

<https://www.rogueamoeba.com/soundsources/>

Video Pencil

Draw on your iPad. Why's that cool? Because the iPad is mirroring your camera feed!
