

iOS 18's Notes App

Man, it does a lot!

iOS 18's Notes App

Man, it does a lot!

Introduction

Christian Boyce

- Mac owner since 1985
- Former rocket scientist
- Native Californian, honorary Texan
- Author, speaker, consultant
- Focuses: training, automation, leveraging Mac and iPhone power
- “This is what I do”

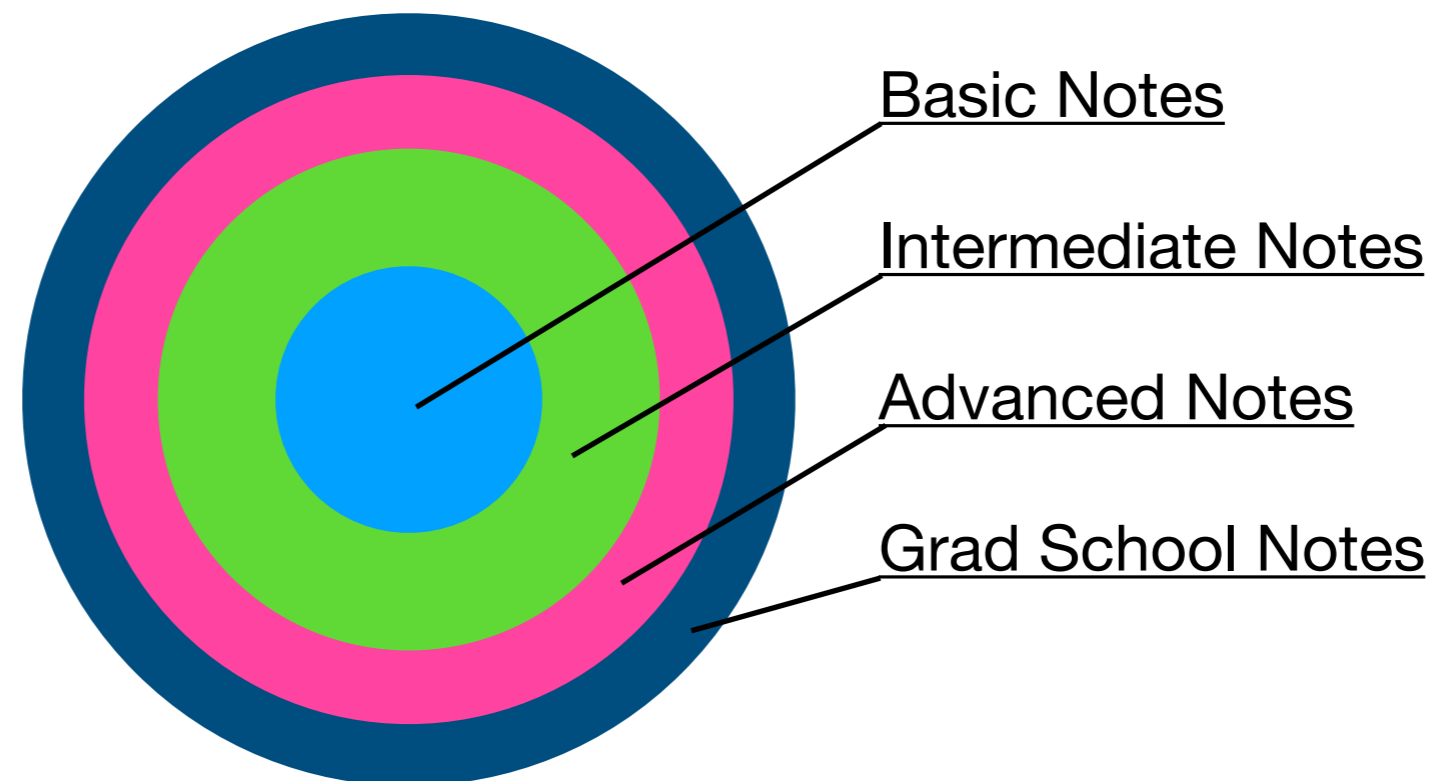

- Visit me at christianboyce.com

How's this going to go?

It's *not* an “A to Z” kind of class today.

It's more like this:

Basic Notes

Basic Notes

Getting started

- Making a note
- Putting text into notes (typing, dictating)
- Putting notes into folders
- Setting things up right
 - *Apple advises you use iCloud, not gmail or aol*

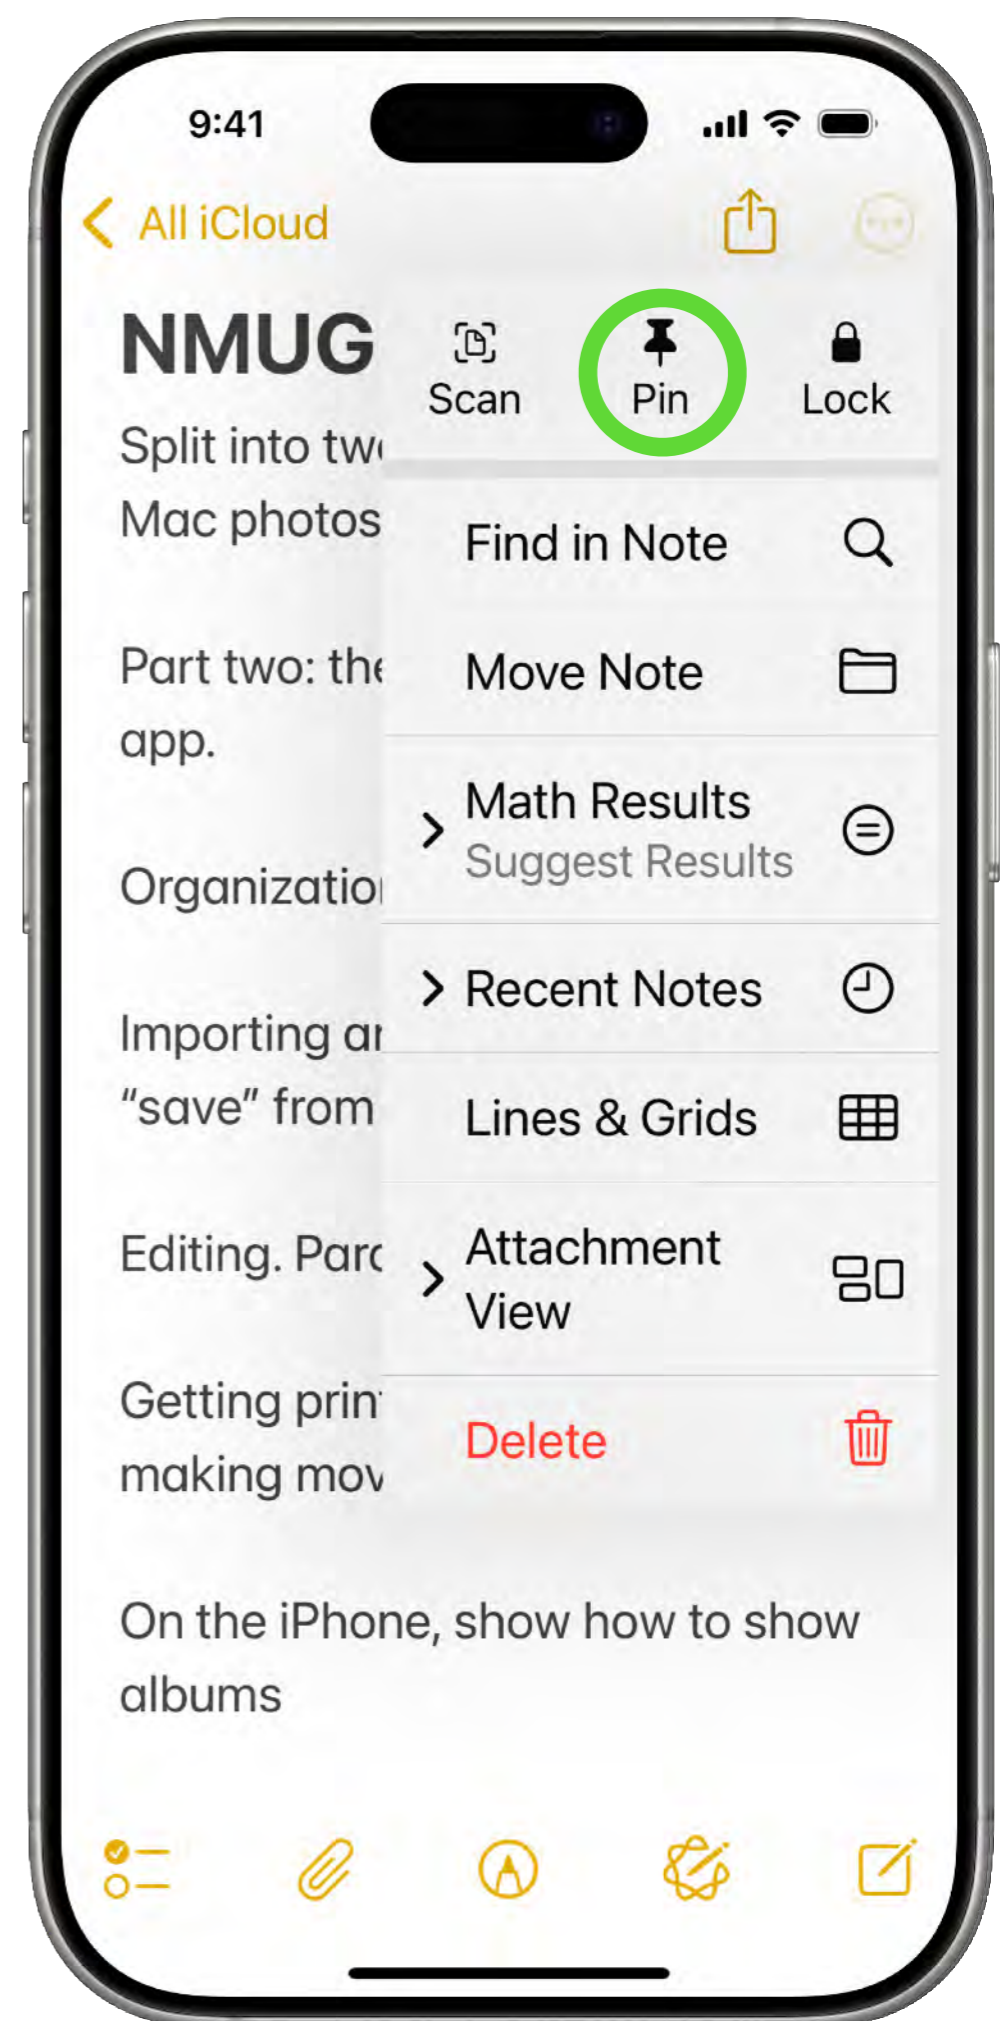

Intermediate Notes

Intermediate Notes

Moving forward

- Making a note via Quick Note in the Control Center
- Asking Siri to make a new note (optional: just keep talking to add content)
- Adding images to notes
- Basic formatting
- Searching for a note
- Searching within a note
- Locking a note
- Pinning a note

Advanced Notes

Advanced Notes

Moving further forward

- Settings and Preferences
- Audio Recordings and transcripts. *It starts with the paperclip.*
- Take a picture (*using the paperclip!*) and put it into your note. It's searchable!
- Long Press on the Notes icon to get more options
- Add a Notes Widget and choose your favorite note or folder

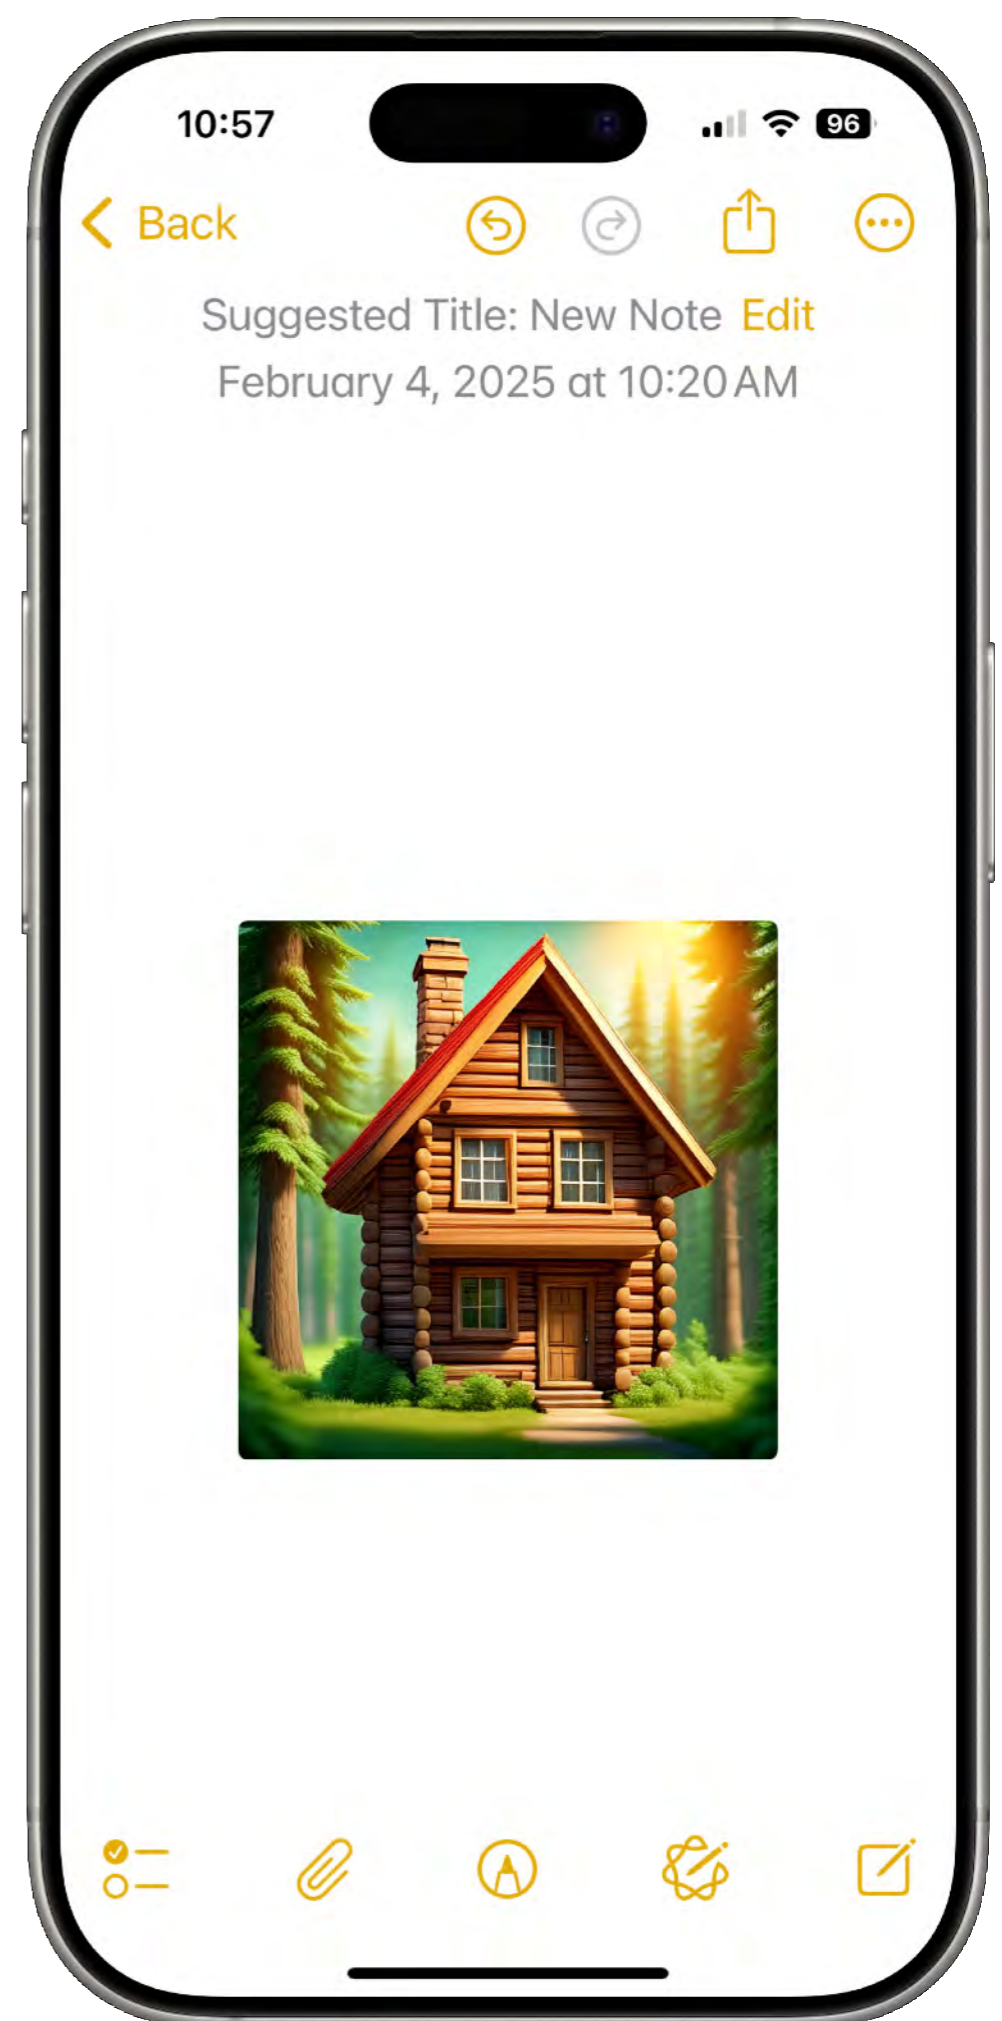

Grad School Notes

Grad School Notes

Extra Credit

- Adding a link
 - *to a web page*
 - *to another note*
- Math Notes
 - *(better on the iPad)*
- Image Wand
 - *Note: you don't even have to start with a sketch at all! Just use the Image Wand to make a circle, and go from there*
 - *(better on the iPad)*

Wrapping it up

For further study
